

Greg Brady

**Founder, CEO,
Head of Research and Development
One Network Enterprises**

Greg Brady founded One Network Enterprises in 2002 and is a renowned supply chain and technology visionary. Before ONE, he led i2 Technologies for seven years, to high growth and market leadership, both as CEO and head of worldwide operations. Previously, Brady was vice president of worldwide applications marketing for Oracle and held positions at J.D. Edwards and at McCormack and Dodge. He holds a Bachelor of Science from Indiana University.

With 30 years of leadership experience running successful global and credited with much of their success, Greg Brady is uniquely qualified as a visionary in supply chain industry.

Once called "the smartest guy in supply chain" by Bruce Richardson at AMR Research, Brady was one of the first to understand the limitations of traditional software applications and business processes that do not effectively plan sales and operations across organizations and their trading partners. In line with that challenge, he orchestrated the world's first real-time demand driven, multi-party, multi-enterprise platform in the cloud to effectively manage end-to-end supply chain processes. It is called the Real Time Value Network.
