

Greg Brady

Founder, CEO, Head of R&D of One Network Enterprises

Greg Brady founded One Network Enterprises in 2002 and is a renowned supply chain and technology visionary. Before that, he led i2 Technologies to high growth and market leadership over seven years, both as CEO and head of worldwide operations.

Previously, Brady was vice president of worldwide applications marketing for Oracle and held positions at J.D. Edwards and at McCormack and Dodge. He holds a Bachelor of Science from Indiana University. With 30 years of leadership experience running successful global businesses and credited with much of their success, Greg Brady is uniquely qualified as a visionary in the supply chain industry.

Once called "the smartest guy in supply chain" by Bruce Richardson at AMR Research, Brady was one of the first to understand the limitations of traditional enterprise-centric software applications and business processes that do not effectively plan sales and operations across organizations and their trading partners. In line with that challenge, he orchestrated the world's first real-time demand driven multi-enterprise platform in the cloud to effectively manage end-to-end supply chain processes.

About One Network Enterprises

One Network is the intelligent business platform for autonomous supply chain management. Powered by NEO, One Network's machine learning and intelligent agent technology, this multi-party digital platform delivers rapid results at a fraction of the cost of legacy solutions. The platform includes modular, adaptable industry solutions that help companies lower costs, improve service levels, and run more efficiently, with less waste.

One Network Enterprises also offers a PaaS solution and developer tools that allow organizations to design, build, and run multi-party applications. More than 75,000 global organizations have joined One Network, helping to transform industries like Retail, Food Service, Consumer Goods, Automotive, Healthcare, Public Sector, Defense, and Logistics. Headquartered in Dallas, One Network also has offices in Japan, Europe, and India. www.onenetwork.com.
